

6V 150mAh Ni-MH Battery Pack

This compact battery pack provides a nominal voltage of 6.0V and a capacity of 150mAh. Constructed with high-quality Ni-MH cells, it ensures long life and consistent performance for various electronic devices.

Overview

Compact Power Solution

This 6V 150mAh Nickel-Metal Hydride (Ni-MH) battery pack is a reliable power source designed for compact electronic applications. Composed of five 1/3 AAA cells connected in series, it offers a consistent nominal voltage and dependable performance. The pack features integrated wiring for straightforward circuit connection, making it an ideal choice for small-sized devices.

Electrical Specifications

Nominal Voltage	6 V
Rated Capacity	150 mAh
Chemistry	Ni-MH (Nickel-Metal Hydride)

Construction

Cell Configuration	5 cells in series
Cell Size	1/3 AAA

Features

Connectivity	Pre-wired, Red/Black Wires, Connector Included
--------------	--

Safety

Disposal Warning
Do not dispose of in fire
