

6V/12V 2/8/16A Battery Charger

This is a high-frequency, double-voltage battery charger for both 6V and 12V batteries. It provides multiple charging rates of 2A, 8A, and 16A for flexibility with different battery sizes and charging needs.

Overview

Intelligent Multi-Stage Charging

This high-frequency, microprocessor-controlled battery charger provides a comprehensive 9-stage charging program designed to optimize battery life and performance. With selectable output currents of 2A, 8A, and 16A, it offers the flexibility needed for various battery sizes and charging requirements. The unit is housed in a durable metal case and features a digital display for easy monitoring of the charging process.

Technical Specifications

Selectable Output Current

- 2
- 8
- 16

Output Voltage

6V, 12V

Case Material

Aluminum

Safety & Protection

Safety Protections

Short Circuit Protection • Reverse Polarity Protection • Overload Protection • Overheat Protection • Spark-Proof

Compatibility

Application Performance Data

Application	Range
Automotive (CCA)	300-1000
Marine (MCA)	420-1300
Deep Cycle (Ah)	50-160
Reserve Capacity (A)	85-270

Compatible Battery Types

WET, AGM, GEL, VRLA, CALCIUM
