

6V/12V Lead-Acid Battery Charger

This portable charger automatically fast charges 6V and 12V lead-acid batteries. It features reverse battery protection and a digital display for monitoring the charging process.

Overview

Intelligent Battery Charging Solution

This portable lead-acid battery charger offers an intelligent, automated solution for maintaining 6V and 12V batteries. Utilizing a standard three-stage charging mode—constant current, constant voltage, and floating charge—it ensures optimal battery health and longevity. With built-in safety features like reverse polarity protection and automatic shut-off, it provides a reliable and user-friendly experience for automotive and motorcycle maintenance.

Technical Specifications

Charging Modes

- Constant Current Mode
- Constant Voltage Mode
- Floating Charge Mode

Safety Features

Reverse Battery Protection • Auto-Stop Charging • Temperature Control Cooling

Supported Voltages

- 6V
- 12V

Compatible Battery Types

Lead-Acid, Gel Battery

Performance Metrics

Performance Metrics

10 A

Charging Current

230 V
