Overview

Heavy-Duty Concrete Mixer Truck

This 6x4 concrete mixer truck is engineered for demanding construction environments, offering a robust chassis and a powerful 371 HP engine. Designed for both high-capacity material transport and consistent mixing, it features a durable drum system with volume options ranging from 8 to 14 cubic meters. With a 30-tonne loading capacity and specialized hydraulic components, this vehicle ensures reliable performance and timely delivery for large-scale infrastructure projects.

Chassis Specifications

Engine Power

371 HP
Engine Power

Axle Load Capacity

Axle Type	Capacity
Front Axle	9
Rear Axle	16

Emission Standard

Euro II

Drivetrain Configuration

6x4

Transmission

10 Forward & 2 Reverse gears

Mixer Specifications

Drum Volume Options

- 8 m³
- 10 m³
- 12 m³
- 14 m³

Drum Construction

Component	Thickness
Body	5
Plate	6

Performance & Logistics

Total Loading Capacity	30 tonnes
Warranty Coverage	1 year or 100,000 km (whichever comes first)
Production Lead Time	50 days
