Overview

Reliable Power Source

This 7 HP gasoline engine is engineered for consistent performance in demanding industrial and commercial environments. Delivering 4.4kW of power at 3600rpm, it serves as an ideal prime mover for generators, water pumps, and heavy-duty machinery. Its robust construction ensures long-term durability, while the recoil start mechanism provides dependable, easy operation.

Maintenance

Air Cleaner Maintenance

- Clean in mild sudsy cleaning solution and dry
- Service interval: every 50 hours (every 10 hours in dusty conditions)
- Dip element in clean engine oil and saturate
- Squeeze out excessive oil before reinstallation
