

7-Inch Grinding Wheel with 1/2-Inch Thickness and 1-1/4-Inch Bore

This grinding wheel has a 7-inch diameter, 1/2-inch thickness, and 1-1/4 inch bore. Constructed from durable abrasive materials, it is designed for long-lasting performance and consistent results in a variety of grinding applications.

Product Overview

High-Precision Pink Aluminum Oxide Wheel

This 7-inch grinding wheel is engineered for high-precision applications, utilizing Pink Aluminum Oxide for superior grinding performance. It is specifically designed for the maintenance and sharpening of cutting tools and measuring instruments. Its durable construction ensures consistent results, making it an ideal choice for grinding high-hardness steel components.

Technical Specifications

Diameter	7 inch
Thickness	0.5 inch
Bore Size	1.25 inch

Material & Compatibility

Abrasive Material	Pink Aluminum Oxide
Suitable Applications	Cutting Tools, Measuring Tools, High Hardness Steel, Precision Grinding

Performance Features

Key Performance Benefits

- High precision grinding capability
- Excellent for hard steel applications
- Superior performance compared to standard white corundum
