

# 7 inch Grinding Wheel with 39C120 Abrasive

This grinding wheel has a 7-inch diameter, 1/2-inch thickness, and a 1 1/4-inch arbor hole. Constructed with 39C120 abrasive grains, it is suitable for sharpening, shaping, and deburring.

## Product Overview

### Precision Grinding Solution

This 7-inch grinding wheel is engineered with 39C120 black silicon carbide abrasive grains, providing exceptional cutting performance on challenging materials. Designed for versatility, it excels in precision tasks such as sharpening, shaping, and deburring. It is an ideal choice for processing non-ferrous metals, ceramics, glass, and various silicate-based materials.

## Technical Specifications

Wheel Diameter	7 inch
Abrasive Material	Black Silicon Carbide (39C120)
Arbor Hole Size	1.25 inch
Wheel Thickness	0.5 inch

## Applications & Compatibility

### Compatible Materials

- Gray cast iron
- Non-ferrous metals
- Non-metallic materials
- Stone
- Ceramics
- Glass
- Refractories
- Silicate materials

### Primary Applications

Sharpening, Shaping, Deburring, Surface Finishing
