

7-Inch TFT/LCD Active Matrix Monitor

This 7-inch TFT/LCD active matrix monitor provides a compact display solution. It includes built-in controls for menu navigation, volume adjustment, and channel selection.

Product Overview

Versatile Compact Display

This 7-inch TFT/LCD active matrix monitor provides a compact and efficient display solution ideal for specialized monitoring and entertainment needs. Designed with user-friendly integrated physical controls, it allows for seamless adjustment of volume, channel, and menu settings. Its portable form factor makes it a suitable candidate for in-car video systems and small-screen industrial or mobile monitoring applications.

Technical Specifications

Screen Size	7 inch
