Overview

Professional Polishing Performance

This 7-inch variable speed corded polisher is engineered for versatility and control across automotive, woodworking, and metal finishing applications. Featuring an integrated rotation speed stabilization system, it maintains consistent RPM under load for a smooth, professional finish. The ergonomic design, complete with soft grip handle and lock-on functionality, ensures user comfort during extended operation.

Technical Specifications

Tool Holder Thread	M14
Polishing Pad Diameter	7 inch

Key Features

Control & Convenience

- Variable speed control
- Rotation speed stabilization
- Spindle lock mechanism
- Lock-on switch for continuous operation
- Soft grip handle

Mounting System	Velcro fixing system
-----------------	----------------------

Compliance

Certifications	CE, EAC
