

7-Ton Horizontal Log Splitter

This horizontal log splitter is equipped with a robust hydraulic system that delivers 7 tons of splitting force. It is designed with a durable steel frame and user-friendly features, making it suitable for efficiently splitting logs of various wood types and sizes.

Overview

High-Efficiency Horizontal Log Splitting

This 7-ton horizontal log splitter is engineered for efficient and safe firewood preparation. Featuring a robust hydraulic system, it handles wood lengths up to 520mm and diameters up to 250mm with ease. Designed for both homeowners and professionals, its compact build ensures portability while the two-hand control system prioritizes operator safety.
