

7 x 1/2 x 1 1/4 GC120 Green Silicon Carbide Grinding Wheel

This grinding wheel has dimensions of 7" x 1/2" x 1 1/4" and is made of green silicon carbide. It is suitable for grinding non-ferrous materials such as aluminum, brass, bronze, and stone.

Product Overview

Precision Grinding Performance

This green silicon carbide grinding wheel is engineered for precision grinding and sharpening applications. Specifically designed for materials with high hardness and brittleness, it excels when working with glass, hard alloys, and non-ferrous metals like aluminum, brass, and bronze. The wheel provides a cool cutting action, ensuring a fine surface finish for tool, cutter, surface, and cylindrical grinding tasks.

Physical Dimensions

Diameter	7 inch
Thickness	0.5 inch
Arbor Hole	1.25 inch

Technical Specifications

Abrasive Material	Green Silicon Carbide
Grit Size	GC120

Applications

Grinding Types

- Tool and cutter grinding
- Surface grinding
- Cylindrical grinding

Suitable Materials	Glass, Hard Alloy, Aluminum, Brass, Bronze, Stone
