

## 7 x 1/2 x 1-1/4 inch Abrasive Grinding Wheel

This abrasive grinding wheel has dimensions of 7 inch diameter, 1/2 inch thickness, and a 1-1/4 inch arbor hole. It features a 38A60H grit, indicating a medium grit aluminum oxide abrasive.

### Product Overview

#### High-Performance White Aluminum Oxide Grinding Wheel

This white aluminum oxide grinding wheel is engineered for precision grinding on high-hardness materials, including high-speed steel, high-carbon steel, hardened steel, and alloy steel. Designed for durability and consistent performance, it provides an optimal balance between material removal rates and surface finish quality. This versatile abrasive tool is suitable for a wide range of industrial metalworking applications.

### Technical Specifications

Diameter	7 inch
Thickness	0.5 inch
Arbor Hole	1.25 inch
Grit Specification	38A60H

### Material Compatibility

Compatible Materials	High Speed Steel, High Carbon Steel, Hardened Steel, Alloy Steel
----------------------	--

### Customization

#### Customization Options

- Parallel cup wheels
- Cup emery wheels
- Cylinder wheels
