

# 7 x 1/2 x 1 1/4 inch Grinding Wheel

This grinding wheel has dimensions of 7" x 1/2" x 1 1/4". It is made with C100-K abrasive grain, which ensures efficient material removal and a smooth finish.

## Product Overview

### High-Performance Grinding Wheel

This 7-inch grinding wheel is engineered with black silicon carbide, making it an ideal choice for processing materials with low tensile strength. It is specifically designed to handle challenging surfaces including gray cast iron, non-ferrous metals, ceramics, and glass. With its precise dimensions and durable composition, this tool provides efficient material removal and consistent performance for shaping and sharpening tasks.

## Technical Dimensions

Diameter	7 inch
Thickness	0.5 inch
Arbor Hole Size	1.25 inch

## Material & Application

### Primary Applications

- Grinding
- Sharpening
- Shaping
- Deburring

Abrasive Material	Black Silicon Carbide
Compatible Materials	Gray Cast Iron, Non-ferrous Metals, Stone, Ceramics, Glass, Refractories, Silicate Materials

## Specifications

Grain Specification	C100-K
