

## 7 x 1/2 x 1-1/4 Inch Grinding Wheel

This 7-inch diameter grinding wheel features a 1/2-inch thickness and a 1-1/4 inch arbor hole. It is constructed with 32A100JVBE abrasive grit for effective material removal and a quality surface finish.

### Product Overview

#### Industrial Grinding Solution

This 7-inch aluminum oxide grinding wheel is engineered for high-precision material removal and surface finishing. It is designed to handle demanding industrial applications, offering consistent performance across various metal types. Its robust construction ensures longevity, making it an ideal choice for sharpening, deburring, and shaping tasks in professional environments.

### Technical Dimensions

|                 |           |
|-----------------|-----------|
| Diameter        | 7 inch    |
| Thickness       | 0.5 inch  |
| Arbor Hole Size | 1.25 inch |

### Material & Compatibility

|                    |   |
|--------------------|---|
| Abrasive Material  | Aluminum Oxide  |
| Grit Specification | 32A100JVBE  |
| Suitable Materials | Carbon Steel, General Steel, Malleable Cast Iron, Hard Bronze |

### Applications

#### Primary Applications

- Sharpening
- Deburring
- Shaping
- Rough Grinding
