

7 x 1/4 Inch Aluminum Grinding Wheel with 5/8-11 Arbor

This 7-inch grinding wheel has a 1/4-inch thickness and a 5/8-11 arbor. It is designed for efficient material removal on aluminum surfaces, minimizing loading and heat buildup during operation.

Product Overview

Professional Grade Angle Grinding Wheel

This T27 DC angle grinding wheel is engineered for high-performance material removal on metal and non-ferrous surfaces. Designed for safety and efficiency, it offers excellent grinding characteristics for applications ranging from grey cast iron processing to edge chamfering. Its durable construction ensures consistent results, making it a reliable choice for demanding industrial grinding tasks.

Technical Specifications

Wheel Type	T27 DC Angle Grinding Wheel
Compatible Materials	Metal, Non-ferrous metals, Non-ferrous alloys, Concrete, Grey cast iron
Abrasive Grade	1 A / WA

Performance Metrics

Performance Highlights

- High cost-performance ratio
- Excellent sharpness for efficient grinding
- High safety standards
- Wear-resistant design

Available Sizes

Available Dimensions

Dimension (mm)	EAN Code	Quantity per Box
100x6x16	M271006M	25 / 200
115x6x22.2	M271156M	25 / 100
125x6x22.2	M271256M	25 / 150
150x6x22.2	M271506M	25 / 100
180x6x22.2	M271806M	25 / 50
230x6x22.2	M272306M	20 / 40
