

# 7" x 1/4" x 1 1/4" Grinding Wheel

This grinding wheel is designed for precision material removal and surface finishing. Its 7" diameter, 1/4" thickness, and 1 1/4" arbor size ensure compatibility with a wide range of grinding machines.

## Product Overview

### Professional Grade Grinding Wheel

This 7-inch grinding wheel is engineered with a black silicon carbide abrasive, specifically optimized for materials with low tensile strength. It delivers consistent performance and efficient material removal on surfaces ranging from gray cast iron and non-ferrous metals to ceramics, glass, and refractories. Designed for durability and precision, this wheel is an essential component for heavy-duty grinding and surface finishing tasks.

## Technical Specifications

Diameter	7 inch
Thickness	0.25 inch
Arbor Size	1.25 inch
Abrasive Material	Black Silicon Carbide

## Applications

### Compatible Materials

- Gray cast iron
- Non-ferrous metals
- Non-metallic materials
- Stone
- Ceramics
- Glass
- Refractories
- Silicate materials

Primary Applications	Grinding, Surface Finishing, Material Removal
