

7 x 1/4 x 1-1/4 Inch Surface Grinding Wheel

This surface grinding wheel is designed for efficient material removal and fine surface finishing. With dimensions of 7 x 1/4 x 1-1/4 inches, it is suitable for a variety of grinding applications.

Product Overview

High-Precision Surface Grinding Wheel

This premium pink aluminum oxide grinding wheel is specifically engineered for high-precision tasks, including the grinding of cutting tools, measuring instruments, and complex machinery parts. Designed for materials with high hardness, it offers superior performance compared to white corundum for demanding steel grinding applications. Its robust construction ensures consistent material removal and fine surface finishing in professional shop environments.

Physical Dimensions

Diameter	7 inch
Thickness	0.25 inch
Arbor Hole Size	1.25 inch

Technical Specifications

Performance Features

- High precision grinding capability
- Superior to white corundum for high-hardness materials
- Consistent material removal rate
- Durable construction for long service life

Abrasive Material	Pink Aluminum Oxide
Primary Applications	Cutting Tools, Measuring Tools, Form Grinding, High-Hardness Steel
