

7 x 3/4 x 1 Inch Bench Grinding Wheel 24Q Grit

This bench grinding wheel measures 7 inches in diameter, 3/4 inch in thickness, and has a 1-inch arbor hole. The 24Q grit provides a balance between stock removal and surface finish, making it suitable for a variety of grinding applications.

Product Overview

High-Performance Grinding Solution

This 7-inch bench grinding wheel is engineered for efficient material removal and shaping tasks in industrial and workshop environments. Constructed from durable Aluminum Oxide, it is specifically optimized for rough grinding applications on various metals. Its 24Q grit specification offers an ideal balance between aggressive stock removal and surface finish quality.

Technical Specifications

Wheel Diameter	7 inch
Thickness	0.75 inch
Arbor Hole	1 inch
Grit Rating	24Q
Abrasive Material	Aluminum Oxide

Applications

Compatible Materials

- Carbon Steel
- General Steel
- Malleable Cast Iron
- Hard Bronze

Primary Application

Rough Grinding • Material Removal • Shaping
