Overview

Reliable 70 kVA Power Solution

This 70 kVA silent diesel generator is engineered for high performance and durability in demanding industrial and commercial environments. Featuring a robust soundproof enclosure, it ensures quiet operation suitable for noise-sensitive sites while providing reliable backup or continuous power. The unit is designed with advanced monitoring systems and high-quality electrical components to ensure safety and ease of operation.

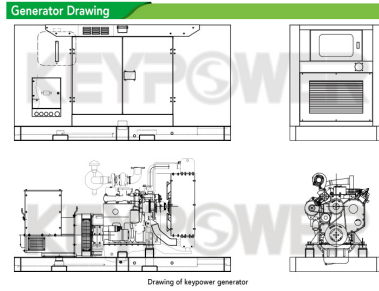

Performance Metrics

Rated Power Output

70 kVA

Prime Power

Technical Features

Front and side elevation drawings showing the layout and dimensions of the silent enclosure.

Enclosure Design

- Silent type soundproof canopy
- Super silent type option
- Open type available
- Weather-protected fiber glass construction

Engine Configuration

Diesel engine powered for high efficiency

Vibration Control

Yes

Components & Build Quality

Detailed view of the internal electrical system, including German terminal blocks and anti-vibration mountings.

Electrical System Details

Component	Feature/Standard
Terminal Blocks	German Phoenix type inside control box
Electrical Wiring	CHINT brand quality
Cable Standards	CE standard cable wiring
Batteries	German Varta batteries for reliable starting

Maintenance & Safety

Daily Maintenance Requirements

- Oil level check
- Coolant and radiator level check
- Battery level monitoring
- Air leakage inspection
- Circuit breaker and emergency stop testing

Safety & Protection

Emergency Stop, Rust Protection Coolant, Anti-vibration Mounting, Fully Enclosed Canopy

Certifications

Compliance documents including ISO and CE certifications ensuring international quality standards.

Compliance & Standards

CE Certified • ISO 9001 • ISO 14001 • TUV CE
