

700 PSI Pressure Gauge with Brass Fitting

This pressure gauge measures pressure up to 700 PSI. It is equipped with a brass fitting for connection to a pressure source.

Overview

Industrial Precision Monitoring

This 700 PSI pressure gauge is designed for reliable and accurate pressure monitoring in diverse industrial and mechanical environments. Featuring a clear, high-contrast display with black markings on a white face, it provides instant readability for operators. The unit is equipped with a durable brass fitting at the base, ensuring a secure and leak-resistant connection to various pressure systems.
