

700C Hybrid Bicycle with Alloy Frame

This hybrid bicycle features a hydroformed alloy frame and front suspension for versatile riding. It is equipped with a multi-speed Shimano drivetrain and double-wall rims for enhanced performance.

Product Overview

Versatile Hybrid Performance

This 700C hybrid bicycle is engineered for versatility, seamlessly transitioning between paved urban roads and unpaved paths. Featuring a durable alloy frame and a responsive front suspension fork, it offers a balanced ride that prioritizes both comfort and control. Designed with an ergonomic saddle and grips, this bike ensures a superior rider experience for daily commuting or recreational cycling.
