

700MB CD-R Media Discs

CD-R media discs offer professional-grade recording capabilities. Each disc has a 700MB capacity and is suitable for audio, video, and data archiving.

Product Overview

Professional-Grade Optical Media

These professional-grade CD-R discs are engineered for high-reliability data storage, audio, and video archiving. Utilizing advanced manufacturing processes, these discs offer superior playback compatibility and a notably low failure rate. Designed for demanding environments, the media features specialized surface treatments that provide enhanced protection against moisture and physical wear while ensuring high-quality print results.
