

# 700ml Dual Cavity Wine Bottle Mould

This dual cavity mould is designed for manufacturing 700ml wine bottles. It is made from high-quality tool steel to ensure durability and consistent bottle formation.

## Product Overview

### Precision Dual Cavity Mould

This precision-engineered dual cavity mould is specifically designed for the high-efficiency production of 700ml wine bottles. Constructed from high-quality tool steel, it ensures exceptional durability and consistent performance throughout long production runs. The design features precise internal dimensions and smooth surface finishes to minimize defects and facilitate effortless bottle release, making it an ideal choice for automated glass manufacturing processes.

## Technical Specifications

Cavity Configuration	Dual Cavity
Target Bottle Volume	700 ml
Material	High-quality tool steel

## Performance Features

### Key Benefits

- Increased production efficiency with dual cavity design
- Precision internal dimensions for accurate bottle formation
- Smooth surface finish for easy bottle release
- Compatible with automated glass blowing machinery

### Production Efficiency

**2 units**

Bottles per Cycle

## Compatibility

Compatibility	Automated Glass Blowing Machinery, Industrial Glass Production
