Product Overview

High-Performance Radial Light Truck Tire

This 7.00R16 radial light truck tire is engineered for durability and reliable performance across various road conditions. Featuring a specialized tread compound and a four-groove design, it offers enhanced stability, wear resistance, and superior water evacuation for safer handling in wet environments. Built with a reinforced bead structure, this tire is designed to handle demanding loads while maintaining safety and comfort for light truck and van applications.

Technical Specifications

Tire Size	7.00R16
