

71.4V 10A Lithium Battery Charger for E-Bikes

This high-performance lithium battery charger is designed for electric bikes and e-bikes. The C600M model provides a 71.4V charging voltage and 10A charging current for efficient and rapid charging.

Overview

High-Performance Charging Solution

This 71.4V 10A lithium battery charger is engineered for reliable and efficient power delivery to electric motorcycles, tricycles, and e-bikes. Featuring a robust aluminum alloy housing and high-efficiency circuitry, it ensures rapid charging while maintaining optimal battery health. Designed for versatility, it supports various battery chemistries including LiPo, LiFePO4, and lead-acid, making it an essential tool for electric vehicle maintenance.

Technical Specifications

Output Current

10 A

Max Charging Current

Output Voltage	71.4 V
Input Voltage Range	200-240V
Maximum Efficiency	91 %

Compatibility

Compatible Vehicles

- Electric Motorcycle
- Electric Tricycle
- Electric Bike

Supported Battery Chemistries	LiPo, LiFePO4, Lead Acid
-------------------------------	--------------------------

Physical Characteristics

Color	Black
Net Weight	1.1 kg
Housing Material	Aluminum alloy
Dimensions	173 x 90 x 51 mm

Logistics

Place of Origin	Guangdong, China
-----------------	------------------
