

717H Motor Grader for Road Construction

The 717H motor grader is a heavy-duty construction machine designed for road construction and maintenance. Its articulated frame enhances maneuverability for accurate grading results.

Overview

Heavy-Duty Grading Performance

The 717H motor grader is engineered for demanding road construction, maintenance, and precision grading operations. Built with a robust articulated frame, this machine offers exceptional maneuverability in tight spaces while maintaining high-torque performance. It features advanced hydraulic controls for precise blade positioning, supported by a comfortable cabin designed to maximize operator visibility and efficiency.

Technical Specifications

Machine Category	Motor Grader
Engine Type	Diesel

Key Features

Control System	Hydraulic Blade Control • Precision Angle Adjustment
Maneuverability	Articulated Frame, Tight Space Navigation

Operator Environment

- Cabin Highlights
- Ergonomic design
 - Excellent visibility
 - Operator safety focus
