Product Overview

High-Speed Mobile Connectivity

This HSPA USB modem provides a reliable and portable solution for high-speed mobile broadband, supporting download speeds up to 7.2 Mbps. Built on the MSM6290 chipset, it offers broad compatibility across 3G and 2G networks, making it ideal for international travel and remote work. The device also functions as a versatile tool with integrated SMS messaging, USSD support, and a built-in Micro SD card slot for expandable storage.
