

7.5 HP Single-Phase AC Motor

This single-phase AC motor delivers 7.5 horsepower at 1500 RPM. It is designed to operate at either 110V or 220V and is suitable for various industrial applications.

General Overview

High-Performance Single-Phase AC Motor

The YL series single-phase capacitor asynchronous motor is designed for reliability and efficiency in various industrial and agricultural applications. Built to adhere to international IEC standards, it features robust construction with 100% copper wiring to ensure stable running and low-noise operation. This 7.5 HP motor offers versatile mounting options and consistent performance for demanding professional use.

Technical Specifications

Rated Power

7.5 HP

Rated Power

Key Performance Data

Parameter	Specification
Voltage	220V
Frequency	50Hz
Frame Size Range	80-132
Efficiency Class	IE1, IE2
Insulation Class	B
Protection Class	IP44

Supported Mounting

- B3
- B5
- B35
- B14
- B34

Compliance and Quality

Certifications

CCC, CE, ISO9001:2015, GB/T19001-2006
