

75 Ohm Foam Dielectric Coaxial Cable

This 75 Ohm coaxial cable features a foam dielectric for optimal signal transmission. Its durable construction ensures reliable performance in various environments, making it suitable for video, data, and communication systems.

Overview

High-Performance Coaxial Solution

This 75 Ohm coaxial cable is engineered with a foam dielectric to ensure optimal signal transmission across video, data, and communication systems. Its advanced construction provides excellent shielding and minimizes signal loss for high-quality performance. Built for durability, this cable is designed to provide reliable connectivity in a wide range of professional environments.

Electrical Specifications

Nominal Impedance

75 Ohm
Impedance

Dielectric Material	Foam Dielectric
Performance Features	Low Signal Loss, Optimal Transmission, Excellent Shielding

Application & Durability

Supported Systems

- Video Systems
- Data Transmission
- Communication Systems

Build Quality

Durable Construction • Reliable Performance • High-Performance
