

7.5-Ton Electric Chain Hoist

The HSY electric chain hoist offers variable lifting speeds for diverse applications. Designed for industrial use, it features a high-strength alloy steel chain and a powerful electric motor for smooth and efficient lifting.

Product Overview

Heavy-Duty Electric Chain Hoist

This electric chain hoist is engineered for demanding industrial lifting applications, offering reliable performance in factories, workshops, and construction sites. Built with a robust carburized chain and a powerful electric motor, it ensures durability and smooth operation under heavy loads. Equipped with advanced safety mechanisms including a mechanical load brake and an integrated cooling fan, this hoist is designed for both efficiency and operator security.

Performance Specifications

Rated Loading Capacity	7.5 t
Lifting Speed Range	2.8 - 6.8 m/min

Technical Features

Speed Control	Single Speed, Double Speed
Cooling System	Yes

Safety & Construction

Safety Mechanisms

- Mechanical load brake
- Chain gear for decelerating
- Carburized high-strength chain
