

7500mAh Portable Jump Starter and Power Bank

This portable jump starter is designed to jump-start vehicles and charge electronic devices. It has a digital display, multiple output ports including a 5V/2.1A USB, and a built-in flashlight.

Overview

Compact Emergency Power Solution

This 7500mAh multi-function device serves as both a powerful vehicle jump starter and a high-capacity portable power bank. Designed for reliability in emergency situations, it features a built-in flashlight and a clear digital display for real-time battery monitoring. Its lightweight, compact design makes it an essential tool for drivers and travelers needing on-the-go power for electronics and vehicles alike.
