Product Overview

Professional HVAC Contactor

This three-pole definite purpose contactor is engineered for reliable electrical switching in HVAC and refrigeration systems. With a 75A current rating and a 24V AC coil, it provides robust performance for controlling compressors, fans, and other critical electrical components. Its durable construction ensures consistent operation in demanding environments, making it an essential component for professional HVAC maintenance and installation.

Electrical Specifications

Rated Current	75 A
Coil Voltage	24 V AC
Number of Poles	3
Application	HVAC, Refrigeration, Compressor Control, Fan Control

Quality & Service

Inspection Procedures

- 100% self-inspection
- Testing before packing

After-Sales Service

Replacement provided for quality issues
