

75KVA Diesel Generator

This 75KVA diesel generator delivers reliable power for various applications. It features a sturdy enclosure, intuitive control panel, and compliance with industry standards.

Overview

Reliable 75KVA Power Solution

This 75KVA diesel generator is a robust power solution designed for high-performance reliability across industrial, commercial, and emergency backup applications. Featuring a water-cooled multi-cylinder engine, it provides stable and consistent power delivery even under demanding load conditions. The unit is built with a focus on durability, ease of maintenance, and compliance with international quality standards.

Performance Metrics

Key Performance Metrics

75 KVA

Rated Power

4

Engine Cylinders

50 Hz

Frequency Options

Engine Specifications

Displacement Range

- 2.5L
- 2.7L
- 3.6L
- 3.8L
- 4.8L

Engine Type

Multi-cylinder small diameter water-cooled diesel engine

Electrical Configuration

Available Voltages

240/415V, 220/380V, 127/220V

Frequency Support

50Hz, 60Hz

Physical Characteristics

Enclosure Features

- Noise reduction technology
- Weather protection
- Sturdy canopy design
- Efficient cooling system

Max Canopy Dimensions (L*W*H)	2730 x 1130 x 1550 mm
-------------------------------	-----------------------

Maximum Canopy Weight	1540 kg
-----------------------	---------

Compliance & Standards

Certifications

TUV • GS • CE • EPA • ISO9001:2015

Regulatory Standards	GB/T2820, ISO3046, ISO8528
----------------------	----------------------------

Operational Conditions

Reference Conditions

- Pressure: 1,000mbar
- Temperature: 40°C
- Relative Humidity: 30%

Control & Monitoring

Control Interface	Intuitive control panel for monitoring and operation
-------------------	--
