Product Overview

Portable Power Solution

This compact car power inverter efficiently converts 12V DC power from your vehicle's cigarette lighter socket into usable AC power. Designed for versatility, it allows you to operate small electronic devices, laptops, and smartphones while on the go. It is an ideal companion for road trips, camping, and any outdoor activity where access to standard power outlets is limited.

Technical Specifications

Rated Power Output

75 W
Power Output

Input Voltage	12V DC
Output Voltage Options	110V AC, 220V AC

Features & Safety

Connectivity

- Standard AC outlet
- USB charging port

Safety Features

Overload Protection • Over-temperature Protection • Short Circuit Protection

Ideal Applications

- Road trips
- Camping
- Mobile device charging
- Small electronics operation
