

75W Public Address Amplifier with Multiple Inputs

This public address amplifier provides 75W output and includes multiple inputs such as MIC1, MIC2/AUX1 and MIC3/AUX2. Treble and bass adjusters allow users to fine-tune audio output.

Overview

Versatile Public Address Amplifier

The 75W Public Address Amplifier is designed for professional audio applications, including public speaking, announcements, and background music. It features a flexible input architecture with multiple microphone and auxiliary channels to accommodate various audio sources. With built-in tone shaping controls and dual-voltage power support, this unit provides reliable performance in diverse installation environments.

Technical Specifications

Output Power

75 W

Peak Power

Power Supply Options

- AC 115V
- AC 230V
- DC 12V

Output Impedance/Voltage

100V, 4-16 Ohms

Connectivity

Available Inputs

- MIC1
- MIC2 / AUX1
- MIC3 / AUX2

Controls

Audio Adjustments

Treble Control • Bass Control • Master Volume
