

7/9 Liter Aluminum Pressure Cooker

This pressure cooker is made with an aluminum alloy A3003 cover and pot. It is compatible with gas, electric, ceramic, halogen, and induction cooker tops.

Product Overview

Professional Aluminum Pressure Cooker

This high-capacity pressure cooker is designed for efficiency and durability, constructed from premium A3003 aluminum alloy. It features a sophisticated mirror-polished exterior for an elegant look and a matte-polished interior for practical everyday use. Engineered for versatility, this cooker is fully compatible with gas, electric, ceramic, halogen, and induction stove tops.
