Overview

Versatile Climate Control Solution

This portable air conditioner offers a flexible 3-in-1 operation system, combining cooling, dehumidifying (dry), and ventilation (fan) functions in a single compact unit. Designed for convenience, it features an auto-evaporative system that minimizes maintenance and includes a complete installation kit for immediate setup. With its 360-degree casters and directed front airflow, it provides efficient, targeted comfort for residential or small commercial environments.
