Product Overview

Efficient LED Illumination

This 7W GU10 LED bulb is engineered for energy-efficient, long-lasting performance in directional lighting applications. Designed with a multifaceted lens to optimize light distribution, it ensures consistent and effective illumination. The bulb features integrated cooling fins on its outer edge to manage heat, ensuring reliability in standard fixtures.

Technical Specifications

Power Consumption

7 W

Power

50 mA

Current

Base Type

GU10

Voltage & Frequency

220-240V~ 50Hz

SKU

SKU16558

Design Features

Design Features

- Multifaceted lens for optimized light distribution
- Integrated cooling fins for heat management
- Cylindrical base for standard installation
- Directional lighting design
