

7W Incandescent Light Bulb

This 7W incandescent light bulb is designed for general illumination purposes. It features a clear glass bulb and emits a warm white light suitable for various indoor applications.

Product Overview

General Illumination Solution

The 7W incandescent light bulb serves as a reliable electric light source designed for general illumination. Featuring a clear glass bulb and a standard screw base, it is engineered for easy installation in a variety of compatible fixtures. Its internal filament produces a warm white light, making it an excellent choice for diverse indoor applications.

Technical Specifications

Power Consumption	7 W
Operating Voltage	120 V

Design & Construction

Bulb Type	Incandescent
Glass Finish	Clear
Base Type	Standard Screw Base

Performance

Light Color	Warm White
Key Features	Energy Efficient, Compact Design, Indoor Use
