

7x1/2x1-1/4 Straight Grinding Wheel

This 7x1/2x1-1/4 straight grinding wheel is designed for precision grinding applications. It is suitable for use with various materials, providing efficient material removal and a smooth finish.

Product Overview

High-Performance Grinding Solution

This straight grinding wheel is constructed from black silicon carbide, engineered for effective material removal on low tensile strength materials. It is an ideal choice for processing gray cast iron, non-ferrous metals, and non-metallic surfaces. The wheel also performs exceptionally well on stone, ceramics, glass, and refractory silicate materials, making it a versatile tool for diverse industrial applications.

Technical Specifications

Dimensions

7 inch

Diameter

0.5 inch

Thickness

1.25 inch

Arbor Hole

Abrasive Material

Black Silicon Carbide

Wheel Type

Straight

Applications

Compatible Materials

Gray Cast Iron, Non-Ferrous Metals, Non-Metallic Materials, Stone, Ceramics, Glass, Refractories, Silicate Materials
