

7x19 Stainless Steel Wire Rope

This high-quality stainless steel wire rope features a 7x19 strand construction for excellent flexibility. It is suitable for various applications requiring corrosion resistance and durability.

Product Overview

Premium 7x19 Stainless Steel Wire Rope

This 7x19 construction stainless steel wire rope is engineered for high flexibility and superior durability in demanding industrial environments. Available in a wide range of diameters from 0.36mm to 20mm, it provides excellent corrosion resistance and strength. This product is manufactured to meet international standards including DIN, GB, EN, and JIS to ensure consistent performance.

Technical Specifications

Material Grade

- AISI301
- AISI304
- AISI304L
- AISI316
- AISI316L

Strand Construction	7x19
Diameter Range	0.36mm - 20mm
Tensile Strength (MPa)	1570, 1670, 1770, 1870, 1960

Compliance & Standards

International Standards

DIN • GB • EN • JIS

Logistics & Packaging

Packaging Options

- Strong wooden reels
- Fumigated plywood reels
- Coils
