

8-15 HP Scroll Compressor for Refrigeration

This high-tech compressor is designed for cooling stage refrigeration equipment. It is ideal for domestic refrigeration and small commercial applications, offering small size and low noise.

Product Overview

High-Efficiency Scroll Compressors

These scroll compressors are engineered for demanding refrigeration applications, offering robust performance in the 8-15 HP range. Designed for cooling stage equipment, they provide reliable operation and energy efficiency for industrial cooling needs. The series includes multiple model variations to suit specific horsepower requirements and weight constraints.
