

8-30kW Power Generator

This generator provides a power solution ranging from 8 to 30kW. It features a robust engine coupled with an alternator, mounted on a sturdy base frame, and includes a radiator for cooling and a control panel.

Product Overview

Reliable Power Generation Solution

This versatile generator system is engineered to provide dependable power output ranging from 8kW to 30kW, making it suitable for a variety of demanding applications. Built with a robust engine and high-performance alternator, the unit is mounted on a sturdy base frame to ensure stability and durability. The integrated cooling radiator and user-friendly control panel facilitate efficient monitoring and operation for consistent performance.

Technical Specifications

Power Output Range

8 kW Minimum Power	30 kW Maximum Power
------------------------------	-------------------------------

Core Components

- Robust Internal Combustion Engine
- High-Efficiency Alternator
- Sturdy Base Frame
- Integrated Cooling Radiator
- Digital Control Panel
