

# 8-Channel 1080P Mobile Digital Video Recorder

This mobile digital video recorder utilizes H.264 compression technology and supports real-time remote monitoring. It is designed to work with ADAS, Driver Status Monitoring Systems, and radar systems for vehicle surveillance and fleet management.

## ADDITIONAL IMAGES

## Overview

### Professional Mobile Surveillance

This 8-channel mobile digital video recorder is engineered for robust vehicle surveillance and fleet management. It utilizes advanced H.264 compression technology to deliver high-definition 1080P recording across all channels, ensuring clear evidence capture. Designed for durability in demanding mobile environments, the system supports real-time remote monitoring, GPS tracking, and seamless integration with ADAS and radar systems.

## Technical Specifications

### Storage Options

SSD • SD Card

Channel Capacity	8 channels
Supported Resolutions	1080P, 720P, D1
Compression Standard	H.264
Shock Resistance	MIL-STD 810G

## Connectivity & Features

### Recording Trigger Modes

- Power on
- Timer
- Motion detection
- G-force
- Over-speeding
- Customized alarm input
- Panic button

### Network Connectivity

3G, 4G, WIFI, GPS

### Supported Platforms

iOS, Android, Windows

## System Metrics

### Pre-recording Buffer

**15 seconds**  
Pre-recording

### G-Force Sensor
