Overview

High-Performance Dewatering Solution

This 8-inch self-priming diesel pump set is engineered for demanding fluid transfer tasks, including sewage handling and site dewatering. Designed for mobility, the unit features a robust trailer mount, allowing for rapid deployment to construction, mining, or municipal sites where external power is unavailable. Its centrifugal design ensures efficient operation even with abrasive solids in suspension, providing a reliable, long-lasting solution for challenging environments.

Technical Specifications

Pump Size	8 in
Pump Type	Centrifugal Self-Priming
Power Source	Diesel Engine
Mounting	Trailer Mounted

Key Features

Operational Advantages

- Self-priming capability for quick startup
- Handles abrasive solids in suspension
- High flow rate centrifugal design
- Portable trailer-mounted configuration
- Integrated control panel for monitoring

Suitable Applications

Construction Dewatering, Mine Site Dewatering, Sewage Handling, Flood Control, Stream Diversion, Municipal Use
