

8-Inch Adjustable Carbon Steel Wrench with TPR Grip

This adjustable wrench is designed for gripping and turning various sizes of nuts and bolts. The wrench features high-quality carbon steel construction for durability and is equipped with a soft TPR grip for comfortable use.

Overview

Professional Grade Adjustable Wrench

This 8-inch adjustable wrench is engineered for precision and durability in demanding work environments. Constructed from drop-forged carbon steel and heat-treated for strength, it features a smooth-operating mechanism for reliable torque application. The ergonomic TPR bi-color grip ensures user comfort during extended use, while the ferro-nickel finish provides superior corrosion resistance.

Technical Specifications

Length (Imperial)	8 in
Length (Metric)	200 mm
