

8-Inch High-Carbon Steel Blade Pruning Shear

This pruning shear has an 8-inch cutting capacity. It is constructed with high-carbon steel blades and an ergonomic handle, and it also features a safety lock.

Product Overview

Professional Pruning Performance

This heavy-duty 8-inch pruning shear is engineered for precision and durability in demanding gardening environments. Featuring high-carbon steel blades, it ensures clean, efficient cuts on branches and shrubs while maintaining sharpness over extended use. The ergonomic handle design is specifically crafted to minimize hand fatigue during repetitive tasks, making it an ideal tool for professional landscaping and maintenance work.

Technical Specifications

Blade Material	High-Carbon Steel
Cutting Capacity	8 inch

Features

Key Features

- Ergonomic handle design
- Safety lock mechanism
- High-carbon steel construction
- Reduced hand fatigue design

Safety Features	Safety Lock, Secure Storage
-----------------	-----------------------------

Application

Primary Applications

Trimming branches • Shrub maintenance • Garden plant care
