

8-Port 10/100M Web Smart Ethernet Switch

This 8-port 10/100M Web Smart Ethernet Switch is designed for small to medium-sized networks. It offers basic management features accessible through a web browser, allowing for easy configuration and monitoring of network performance.

Product Overview

Professional Web Smart Networking

The S2508 is a compact 8-port 10/100M Web Smart Ethernet Switch engineered for small to medium-sized business environments. It provides essential management capabilities via an intuitive web-based interface, enabling administrators to easily configure and monitor network performance. With integrated auto-negotiation, the device seamlessly detects speed and duplex modes to ensure reliable connectivity for all connected peripherals.
