

8-Port Gigabit Ethernet Switch

The 8-port Gigabit Ethernet switch is designed for high-speed network connectivity. It features a compact design suitable for desktop or small office environments.

Overview

High-Speed Network Connectivity

The 8-Port Gigabit Ethernet Switch is designed to provide robust and high-speed network connectivity for office and desktop environments. It features advanced auto-negotiation and auto-MDI/MDIX support, ensuring a seamless plug-and-play installation without complex configuration. With eight Gigabit-capable ports, it is an ideal solution for expanding local network capacity and improving overall data transfer speeds.

Technical Specifications

Total Ethernet Ports	8
Port Speed	Gigabit
Automatic Features	Auto-negotiation, Auto-MDI/MDIX

Monitoring and Indicators

LED Indicators

- Power
- Link/Act status per port

Design and Application

Application

Desktop • Small Office
