

8-Port Power over Ethernet Smart Hub

This 8-Port Power over Ethernet Smart Hub is designed for efficient network management and power distribution. It supports Power over Ethernet (PoE) functionality, allowing it to supply power to connected devices directly through the Ethernet cable.

Product Overview

Efficient Network and Power Distribution

The 8-Port Power over Ethernet Smart Hub provides a streamlined solution for powering and managing network devices. Designed for small to medium-sized business environments, this smart hub supports Power over Ethernet (PoE) functionality to deliver electricity directly to connected hardware. It simplifies infrastructure by eliminating the need for separate power sources for IP cameras, VoIP phones, and wireless access points.

Technical Specifications

Total Ethernet Ports	8
Power over Ethernet (PoE)	Yes

Applications

Compatible Devices	IP Cameras, VoIP Phones, Wireless Access Points
